THE WALLET WAR

In a world where over 87% of the planet's population are mobile users, the War of the Wallets is set to be one of the biggest land grabs ever. The disputed territory lies at the confluence of mobility, money, retailing, banking, so the stakes really couldn't be higher.

EMV IMPLEMENTATION AND FINANCIAL SERVICES

Europe, Canada, Latin America and Asia/Pacific are all in various stages of EMV chip migration and usage, leaving the U.S. region as the last major hold-out for implementing the otherwise global standard. This session is a unique opportunity to learn from the other countries that have already migrated!
